EDUCATION

Jamia Millia Islamia, University

Bachelor Of Technology In Computer Engineering - **CGPA: 8.75 (up to present)**

New Delhi, India

Aug 2024 - present

Ingraham institute English medium school

Class 12th Boards - **Percentage - 88.40%**

Ghaziabad, India

Mar 2022 - Jun 2023

PROJECTS

CRUD Todo App | HTML, CSS, JavaScript

- Developed a browser-based Todo application supporting full CRUD operations
- Implemented dynamic task management with real-time DOM updates and event-driven interactions
- Structured application logic using modular JavaScript functions and array-based state handling
- Integrated localStorage for persistent data management across sessions
- Designed responsive and user-friendly interface using semantic HTML and CSS

Personal Library App | HTML, CSS, JavaScript

- Developed a browser-based library management application to add, remove, and track reading status of books
- Implemented dynamic table rendering and event-driven UI updates using JavaScript DOM manipulation
- Designed object-based data structure to store book details including title, author, pages, and read status
- Used form handling and input validation to manage user interactions and data submission
- Implemented unique ID generation and array-based state management for efficient book operations
- Built responsive interface with modal form design using HTML and CSS

On-Screen Calculator Web App | HTML, CSS, JavaScript

- Built an interactive on-screen calculator supporting basic arithmetic operations
- Implemented event-driven input handling using JavaScript event listeners
- Managed calculator state using operands and operators to ensure correct evaluations
- Added edge-case handling such as decimal validation, divide-by-zero checks, and overflow control

SKILLS

Programming Languages: C, C++, Python

Web Technologies: HTML, CSS, JavaScript

Core CS: Data Structures, Algorithms, OOP

Tools: Git, GitHub, VS Code, Linux

ACHIEVEMENT

Leetcode - rudrakshupadhyay

- Solved 270+ Data Structures and Algorithms problems on LeetCode

RELEVANT COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Digital Logic
- DBMS
